Achieving Greater Heights

# An Intelligent Surveillance Solution

## How would BotPatrol help?

BotPatrol uses AI-driven computer vision technology that runs in the background, requiring no human attention. This enables it to deliver results 24/7 with near-zero error rates.

**Accuracy**- With everything pre-configured, there are no delays in implementation

**Audit Trial** - Fully transparent audit logs show precisely what happened and when

**Consistency**- Targeted processes are completed on time, consistently, every time

**Reliability**- No sick leaves and exceptionally high efficiency, as BotPatrol operates 24/7, every single day

## Transforming Efficiency with Advanced Features

### Security Features

- Unattended object
- Tripwire / Intrusion
- Change of FOV for camera

### Traffic Management

- Wrong parking
- Wrong direction vehicle movement
- Heavy vehicle detection during restrictive hours
- Wrong way detection

### People In/Out Counting

- People in/out counting
- People flow heat-map
- Over-crowding detection
- Fall detection
- Average customer spending time

### Crowd Management

- Tracks and records the entry and exit of people within the car showroom.
- Provides an accurate count of visitors
- Logs movements, offering detailed reports on the number of people entering and leaving the showroom

### Safety

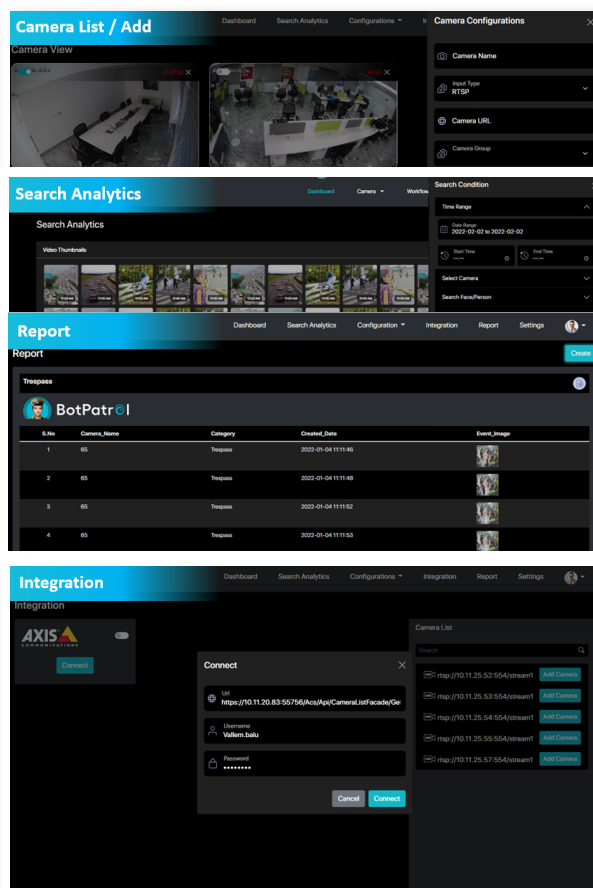

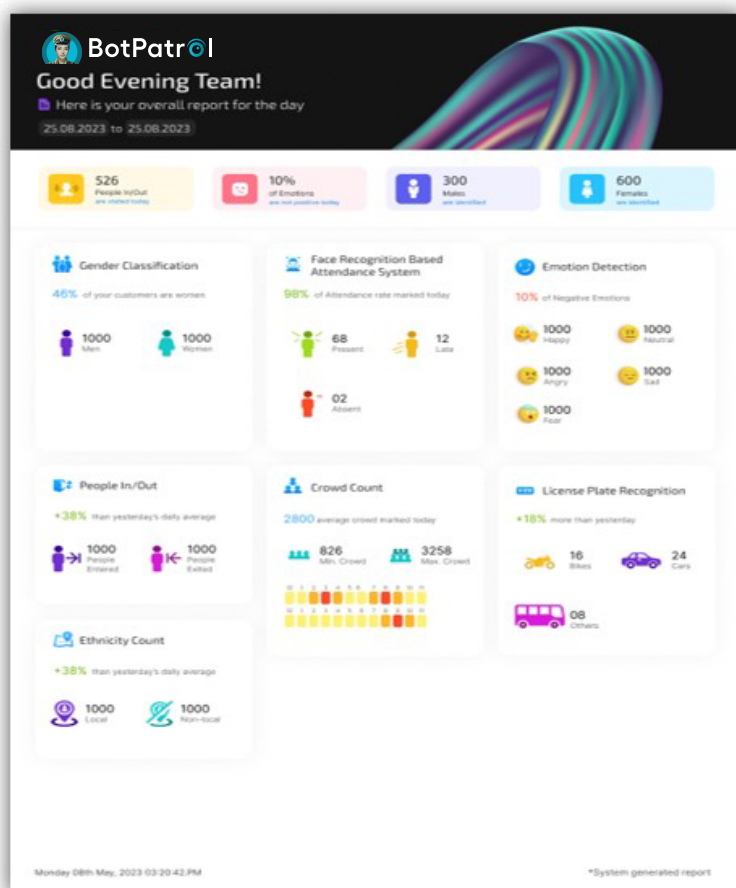

- Safety gear adherence detection
- Fire detection
- Smoke detection

### Fire Detection

- Provides real-time fire detection for prompt response to emergencies.
- Utilizes cameras to detect flames and send immediate alerts to security personnel
- Cameras should be strategically positioned in high-risk areas such as kitchens, chemical storage rooms, and manufacturing zones
